Asansol Engineering College

**OPERATING SYSTEM
(PCCCS502)
MRS. LUMBINI BHAUMIK
DEPT. OF CSE
ASANSOL ENGINEERING COLLEGE**

Data Flow Architecture

- This architecture is applied when input data are transmitted through a series of computational or manipulative components into output data.
- It uses both pipe and filter and it has a set of components called filters connected by pipes.
- Pipes are used to transfer data from one component to the next.
- Each filter works independently and accept data input of a certain form, and produces data output (to the next filter) of a specified form.
- A filter does not require knowledge of the workings of its neighboring filters.

WHAT IS PRIORITY SCHEDULING?

- **Priority Scheduling** is a method of scheduling processes that is based on priority.
- The processes with higher priority should be carried out first, whereas jobs with equal priorities are carried out on a FCFS basis.

Description

• Requirements Gathering and Analysis

A prototyping model begins with requirements analysis and the requirements of the system are defined in detail. The user is interviewed in order to know the requirements of the system.

• Quick design

When requirements are known, a preliminary design or quick design for the system is created. It is not a detailed design and includes only the important aspects of the system, which gives an idea of the system to the user. A quick design helps in developing the prototype.

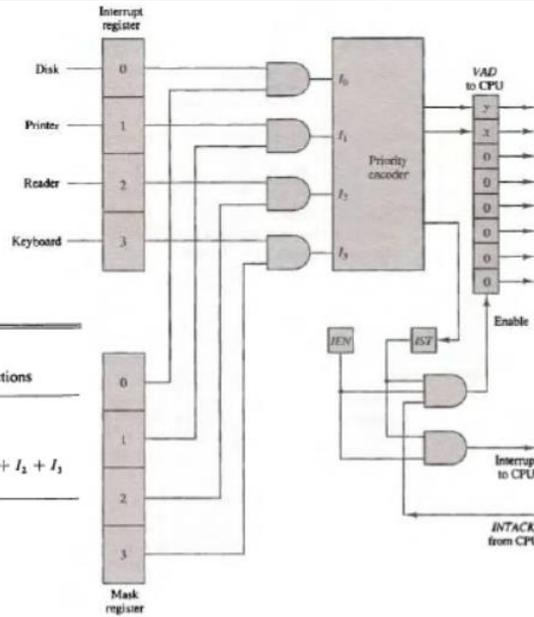

Input / Output Organization-1
PCC-CS 302

Partition Algorithm

Step 1 – Choose the highest index value as pivot

Step 2 – Take two variables to point left and right of the list excluding pivot

Step 3 – left points to the low index

Step 4 – right points to the high index

Step 5 – while value at left is less than pivot move right

Step 6 – while value at right is greater than pivot move left

Step 7 – if both step 5 and step 6 does not match swap left and right repeat step 5 onwards till left<right

Step 8 – if left ≥ right, the point where they met is made partition with the pivot
